- PC connection
- Hands-free dictation via foot switch (only DS-9000, DS-9500)
- Multi-function cradle
- Fast charging
- Playback control via footswitch (only DS-9500, DS-9000)
- Dedicated connector for voice recorder

Charge. Connect. Transfer.

This docking station for the DS-9500, DS-9000 is the professional add-on, which allows you to transfer your dictations via USB or LAN (only supported by DS-9500). Connected with an Olympus AC-Adapter it charges your DS-9500 in half the time than via USB connection (USB: ca. 4 hours). It also provides a connector to your Olympus footswitch to remote control the recorder for hands-free dictation or transcription. The dedicated connector for your voice recorder spare the fragile microUSB connector from being broken easily after several connections.
