A patch is available for the following products:

The patch is also available for the following languages:

- [English](#)
- [French \(bilingual with English\)](#)

What the Patch Fixes

- Slow performance and hang issues no longer occur.
- In Outlook, "*Command <text>*" commands (for example, "Correct Smythe") no longer stop working after a user adds a signature or image to an email message.
- Jumping cursor issues no longer occur.
- Replying to an email in the reading pane no longer closes the reading pane unexpectedly, leaving the reply stored in the Drafts folder.
- Dragon no longer causes Office applications to fail.
- Loss of Full Text Control or focus no longer occurs in Office applications.
- Dictation no longer stops working in Office applications.
- The "Runtime error R6025 - pure virtual function call" error message no longer occurs during dictation in Microsoft Word 2010.

- When you say “Scroll Down” or “Page Down” in an Office document or email message, the document no longer scrolls back up.
- And more!

Instructions

1. Close all applications including Dragon.
2. Download the update [here](#).
3. Restart your computer.
4. Double-click the downloaded “DPI15DOT3.exe” file.
5. Follow the InstalShield Wizard instructions.
6. Enjoy.
